

REPRESENTATION

MIDI channel — MIDI channel designation

DESCRIPTION

The **MIDI channel** tandem interpretation permits the encoding of notated MIDI channel for a Humdrum representation.

MIDI channel tandem interpretations consist of a single asterisk, followed by the keyword Ch, followed by an interger indicating the channel number.

SIGNIFIERS

The following table summarizes the mappings of signifiers and signifieds for MIDI channel indicators.

0-9	integer numbers representing the channel
-----	------------------------------------------
